

(c) *Tax tolerance.* The net contents of bottles or other containers of untaxpaid wine in the same tax class filled during six consecutive tax return periods, as determined from the bonded wine premises proprietor's fill test records, shall not vary by more than 0.5 percent from the net contents as stated on the bottles or other containers. The bonded wine premises proprietor is liable for the tax on the entire amount of wine in the same tax class when that wine is removed from bond, without benefit of tolerance, when the fill of bottles or other containers exceeds a 0.5 percent average of a period which consists of six consecutive tax returns, or when filling is not conducted in compliance with good commercial practice.

(d) *Fill tests.* The proprietor shall test at representative intervals wine bottled or packed during the bottling or packing operation of each bottling or packing line to determine if the wine contained in the bottle or other container is in agreement with that stated on the label, bottle, or other container.

(e) *Alcohol tests.* The proprietor shall test the alcohol content by volume to determine the tax class of the wine and to ensure the alcohol content to be stated on the label is in agreement with the requirement of § 24.257. (Sec. 201, Pub. L. 85–859, 72 Stat. 1381, as amended (26 U.S.C. 5368))
